

## PROP KNOCKERS

The Prop Kocker Propeller Removal tool is designed to remove propellers with less effort and expense than your typical prop pullers. By simply removing the shaft nuts, threading the PropKocker onto the shaft, and striking with a hammer, all but the most stubborn propellers will be loosened, and ready to be removed. Made from Nibral, this tool is durable, and made to last for years.

Part Number	Shaft Sizes	Net Price
PK1.000	1" & 1-1/8"	\$56.00
PK1.250	1-1/4"	\$61.00
