- REMOVE PROPELLER WHILE BOAT IS IN WATER
- PREVENT DAMAGE AND INJURY; WILL NOT BEND SHAFT
- THREE-POINT DISTRIBUTION OF FORCE
- MADE OF STEEL FORGINGS AND CASTINGS FOR MAXIMUM STRENGTH AND TOUGHNESS
- ZINC OR CADMIUM PLATED BOLTS, STUDS, NUTS & WASHERS FOR MAXIMUM CORROSION
- COMBINATION PULLERS REMOVE 2, 3, 4 AND 5 BLADE PROPELLERS

For over 25 years Walter Safe-Way Propeller Pullers have been proven indispensable to quickly and safely remove propellers. Any boat on extended cruising with spare propeller and puller aboard can avoid costly aggravating and time-consuming delays due to a bent wheel.

Simply loosen the propeller shaft nut a few turns, slip the puller over the propeller, hook the square head bolts into the sockets and tighten the nuts evenly until the propeller is loose. Usually even frozen propellers can be removed by exerting pressure with the puller and shocking the end plate. Made in U.S.A.

No. 1

PROPELLER PULLER SIZES

Size No. 1.....\$118.00

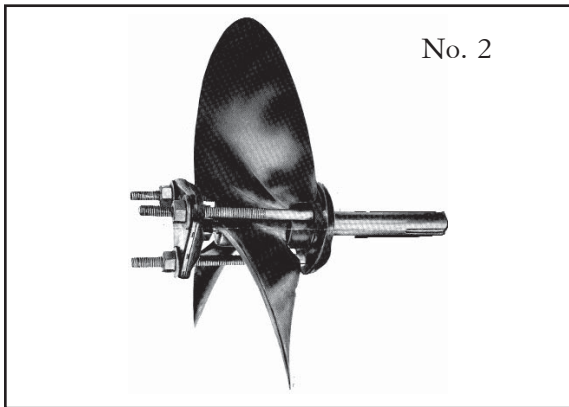

Capacity: 3 blades only

Up to 20" propeller and 1-1/2" shaft

Size No. 2.....\$174.00

Capacity: 3 blades only

Up to 28" propeller and 2" shaft

No. 2

Size No. 2N\$268.00

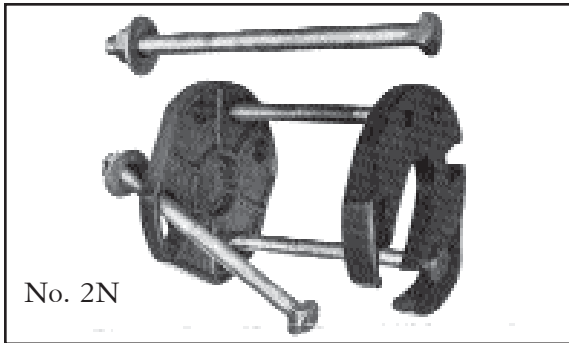

Capacity: 2, 3, 4 and 5 blades

Up to 28" propeller and 2" shaft

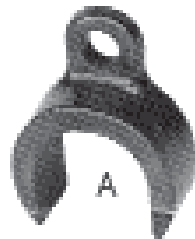

Size No. 3N\$448.00

Capacity: 2, 3, 4 and 5 blades

Up to 40" propeller and 3" shaft

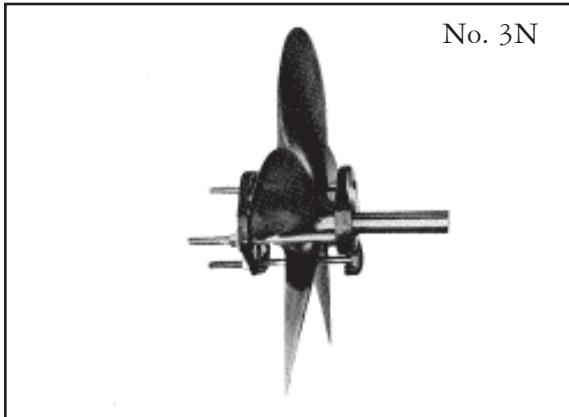

No. 2N
